The primary focus of the department is to promote cutting edge research in the field of Molecular Biology, Genetic engineering, Cell Biology, Neurobiology, Probiotics and Human Health, Limnology, Insect Biology and wild life conservation biology. The Department of Zoology comprises of a community of dynamic faculties, who are passionate and committed to serving and leading the department through innovative teaching and research. The department organizes eminent lectures/ workshops/ seminars by inviting experts working in cutting edge research area in various disciplines from other reputed universities and institutes for enhancing research and academic knowledge.

About the conference

The International Conference on “Advances in Biological Sciences for Sustainable Development” is themed around cutting-edge technologies in the fields of Biological Sciences. This conference aims to draw together researchers, specialists, designers, students, and decision/policy makers in all fields of Life Sciences and provides an inclusive panel for the dissemination of primary study conclusions, new approaches, and developmental practices that focus on both principles and application as well as sustainable development. The purpose of the conference is to attract leading experts from all the major streams of Biological Sciences and its sister branches. Attending this conference would help participants reflect on their work to sharpen their skills and refine their ideas using novel approaches by meeting with their peers and contemporaries. This platform will provide an opportunity to share practical challenges encountered and solutions adopted in research and management. It will also provide an opportunity for the participants to network, collaborate, and develop innovative ideas.
